

PARK TO PLAYA TRAIL

- The Park to Playa Trail is a 13 mile trail network connecting the Baldwin Hills Parklands to the Ballona Creek Bike Path, through the Ballona Wetlands and ultimately linking to the beach bicycle path near Marina Del Rey.

- The Baldwin Hills Regional Conservation Authority is working with local park agencies to design and develop new trail connections and improve existing trails.

- Current efforts are focused on creating a seamless connection through the eastern portion of the trail from the Stocker Corridor in the east through the trail systems of Ruben Ingold Park, Norman O. Houston Park, Kenneth Hahn State Recreation Area, and the Baldwin Hills Scenic Overlook to the west.

- When complete, the Park to Playa Trail will be Los Angeles County's first urban regional trail.

BACKGROUND:

In 2000, the "Park to Playa" vision was first articulated as a seamless trail connecting urban residents with the natural coast. A feasibility study and wayfinding plan was completed in 2011 through the collaboration of 13 public agencies and public input through several community meetings and various surveys. Efforts are now underway to complete construction documents and environmental analysis.

FOR MORE INFORMATION:

Download the feasibility study and find more information at the Baldwin Hills Regional Conservation Authority website:
